

RIYANSH SACHDEV

riyansh10@gmail.com | (+91) 7715829631 | [LinkedIn](#) | [GitHub](#) | Jersey City, NJ

SKILLS

- **Languages:** Java, Python, C++, GO, R, HTML, CSS, JavaScript
- **Tools:** Git, GitHub, GitHub Actions, AndroidStudio, Postman, Docker, Cloudera, Flask API, Sentinels, NGINX, Gorilla Websockets
- **Artificial Intelligence & Machine Learning:** TensorFlow, PyTorch, NumPy, Pandas, Folium, SciPy, Scikit Learn, OpenCV, PyAutoGUI, MediaPipe, Transformers, LangChain, LangGraph, RAG, Vector Databases (ChromaDB)
- **Data & Infra:** MySQL, SQLite, Redis, PostgreSQL, Ristretto, Apache Hive, Hbase, Spark, Hadoop, Tableau, Firebase, XAMPP

EDUCATION

- **Master's of Science in Computer Science** *Incoming Fall 2026*
New York University, Tandon School of Engineering Brooklyn, NY
Relevant Coursework for Semester I: *Design & Analysis of Algorithms I, Software Engineering I, Big Data*
- **Bachelors of Technology in Computer Engineering** *2022 - Present*
Mukesh Patel School Of Technology, Management & Engineering Mumbai, India
CGPA: 3.61/4 (Through Semester 7)*

EXPERIENCE

- **Software Development Engineering Intern | Finseal Software Services Pvt. Ltd.** *Jan 2026 - Present*
 - **FinRAG:** Built a fully offline RAG assistant for document Q&A using Llama 3.1 8B and nomic-embed via Ollama, ChromaDB, and LangChain – runs entirely on local infrastructure with zero API calls or data egress; applied MMR retrieval and metadata-based source filtering to suppress boilerplate and scope answers per document.
 - **TradeFlow:** Built a real-time market-data backend in Go ingesting live Binance feeds across 6 streaming analytics engines; sustained 500 concurrent WebSocket clients over 300 instruments – 776K messages delivered with 0 drops at ~100ms avg latency and stable ~10MB memory.
- **Business Analyst Intern | VA Global Business** *May - July 2025*
 - Built interactive dashboards over the company's purchase and sales financial data, turning raw spreadsheets into views used by leadership for pricing and procurement decisions.

PROJECTS

- **Finetuning Large Language Models by DeepLearning.AI** *Oct 2025*
 - Implemented an end-to-end LLM fine-tuning pipeline using Transformers and PyTorch, covering dataset preprocessing, gradient-based weight updates, and performance benchmarking.
- **Pneumonia and Tuberculosis Detection from X-Rays** *Sep 2025*
 - Trained and benchmarked 4 deep learning models (Custom CNN, ResNet50, MobileNetV2, InceptionV3) to classify chest X-rays into Normal, Pneumonia, and Tuberculosis classes, achieving 84.83% validation accuracy with the InceptionV3 model.
- **Earthquake Prediction & Magnitude Forecasting** *Apr 2025*
 - Built regression and classification models (Scikit-Learn) to predict earthquake magnitude and severity across India, with interactive Folium risk-zone visualizations.
- **Show Booking Platform** *Mar 2025*
 - Developed a Spring Boot microservices system (4 services, API Gateway, Netflix Eureka) with JWT-based authentication and MySQL persistence.

PUBLICATIONS & AWARDS

- **QueryMate – Linking Natural Language to SQL Queries.** *Jan 2026*
 - Sachdev, R., Garg, P., Bhua, A.
Peer-reviewed conference paper on a natural-language-to-SQL system, presented at ICAIDISS 2026, Sharda University Agra.
- **Toycathon winner | Issued by MoE's Innovation Cell, Govt. of India** *Jun 2021*
 - National hackathon win for a GUI educational game in Python (Tkinter, Turtle, Pandas, NumPy, MySQL) promoting game-based learning for children.

CERTIFICATIONS

- **IBM RAG and Agentic AI Professional Certificate – In-progress (6/10 courses)** *May 2026*
 - GenAI specialization building RAG, multimodal, and agentic applications with LangChain, LangGraph and vector stores.
- **AWS Academy Graduate - Cloud Architecting - Training Badge** *Oct 2025*
 - Demonstrated proficiency in designing and deploying scalable, secure, and cost-efficient cloud solutions on AWS.
- **DeepLearning.AI & Stanford Online Machine Learning Specialization** *Jun 2025*
 - Completed a 3-course specialization covering supervised, unsupervised, and reinforcement learning plus recommender systems.
- **IBM Data Science Professional Certificate** *Sep 2024*
 - 10-course program in Python, SQL, data visualization, and ML, capped by a pipeline predicting SpaceX launch outcomes.
